DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Satran et al. in view of Lillie.

Satran et al. discloses a rotary cutting tool comprising flutes (5a,5c), inserts(6) and receiving pockets for said inserts and most of the claimed invention except for different angular pocket spacing and different axial/radial spacing. Lillie teaches at column 5, lines 13-34 that it is well known in the art to space the insert pockets at various angles and spacings. It would have been obvious to one having ordinary skill in the art at the time the invention was made to locate and space the components of Satran et al. in the claimed manner as taught by Lillie in order to increase the versatility of the tool such that many types of operations can be performed.

Art Unit: 3722

Further, it would have been obvious to one having ordinary skill in the art at the time the invention was made to locate the cutting inserts in the claimed array of rows and columns, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

Response to Arguments

Applicant's arguments filed 12/16/04 have been fully considered but they are not persuasive.

Applicant argues that Lillie neither teaches or suggests the angular spacing of the cutting inserts claimed by applicant. The examiner submits that applicant acknowledges that Lillie discloses that the physical relationships may be varied as deemed necessary (see column 5, lines 13-34 of Lillie) and that it would have been obvious to one having ordinary skill in the art at the time the invention was made to locate the cutting inserts in the claimed array of rows and columns, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

Further, a person having ordinary skill in the art is presumed to have knowledge of all of the relevant prior art in his field of endeavor, as if it were all hanging on his workshop walls. *Filmon Processs Corp. v. Spellright Corp.*, 155 USPQ 635. Hence, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the

Art Unit: 3722

applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). Therefore the examiner submits that the rejection is proper.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
